

WiFi Stick Datalogger Quick Installation Manual

Version: 3.4

WiFi Configuration

If you have logged in, please click "Tool" to enter "WiFi Configuration"

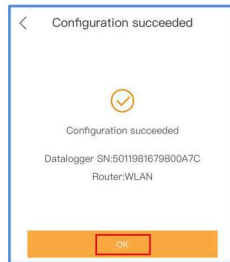

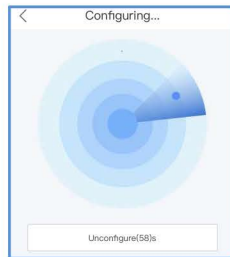

Manually input datalogger SN or Scan the SN on the datalogger.

Click "📶", make sure the phone is connected to router WiFi and switch back to the page to fill in the WiFi password, then move to next step.

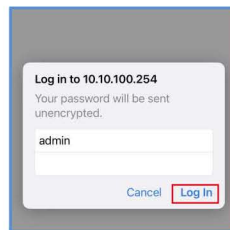

Wait for around 10 seconds. After the configuration completed, click "OK" and back to the main page, If multiple re-do the configuration still fail, please perform web configuration.

Step7: The wireless device (mobile phone or laptop) connects to the datalogger hotspot (Solis_serial number). The Password is 123456

Step8: Open a web browser, enter 10.10.100.254, fill in the Username and Password, click Log In. Username: admin Password: 123456

Step9: Select Quick Set, search the router WiFi, and enter the password. Click Save, and appears the setting success interface.

If failed, please re-do the configuration process
